trust hearing before Examiner Henry P. Brown, Jacob M. Dickinson, special a sistant attorney general, succeeded in drawing from Harry A. tion of hundreds of documents bear ing upon the connection of the Amerfcan Steel and Wire company with the wire rope pool.

The papers in question were the basis of the injunction by which the government attempted to restrain the steel corporation from destroying any more evidence in connection with the wire pool indictments. Among them were letters said to reveal the connection of the United States Steel Products company with the wire pool and its participation in the fixing of prices. They had been returned by the United States district attorney to the American Steel and Wire company with the understanding, the government contends, that they were

Under questioning from Mr. Dickinson. Mr. Whitney related how early in November or late in October he Vice President Baackes, superintended the destruction of the documents. which were burned beneath the boilers of the north works of the Ameri-Worcester, Mass.

Roosevelt **Claims To** Be Pleased

Hears Good News From Several States In West.

Oyster Bay, N. Y., May 9 .- As the reports of the Roosevelt successes in Texas, Washington, Kansas and Minnesota roll in on top of the Maryland victory, the colonel is overjoyed.

Ohio is in the foreground as the next and almost the final battlefield. Colonel Roosevelt refuses to comment on the outlook, saying: "I'm a better warrior than a prophet." But from his air of confidence he evidently believes Ohio will declare for him.

The ground for the Ohio fight is being gone over most carefully. No detail is being lost sight of. The colonel is going a day shead of time previously announced, leaving on Monday instead of Tuesday. William Ward and James Garfield were among those who went into conference with the colonel especially en the Ohio situation.

SELLERS OF UNWHOLESOME FOOD

The Supreme court of Louisiana recently rendered a decision which is of interest to everyone who even occasionally dines in a public restaurant. The plaintiff claimed that he in tones my heart would thrill was poisoned from having eaten cakes and chocolate with whipped cream at the defendant's confectionery where refresh ments were served to the public.

The court holds that a seller of food, such as chocolate and cakes sold at a public eating place, is presumed to know How calm was my poor any unwholesome condition of the food, and is liable for damages to a purchaser through being made ill on account of un- Her angel face. I see it vet wholesomeness. It is common knowledge, to which the keeper of a public eating place must be held, that food in which the within the halls of home process of decomposition has begun is liable to make the person who eats it ill.

The measure of damages sustained by a purchaser of food, where all were false live found who is made ill through its unwholesomeness, is not merely reimbursement of the price, but all damages that were foreseen My councellor and guide or could have easily been foreseen as likely to have resulted.

The court thinks that \$100 was not an excessive award to in teaching me the way to live a purchaser of food for illness resulting from ptomain poisoning caused by unwholesomeness of the food, where he suffered intense pain, believed for two hours that he was in danger of death and suffered an attack of jaundice in consequence.

RACE DECAY AND SOCIAL HYGIENE

The ery about "race suicide" which is so frequently heard! nowadays is taken by some to represent a serious sociologic problem demanding earnest consideration on the part of farseeing nations. There can be no doubt that a fall in the birthrate has been spreading in Europe for several decades; but the question arises whether the underiable statistical facts justify the alarmist statements and protests which have gone forth probably Friday from time to time. Are the nations involved and the world at large threatened with dire consequences from the failure of certain classes to replenish the earth with successors of their own becoming variable

Discussions of this sort are primarily of interest to the ally fair Thursday sociologist rather than to the physician. But they can be elimipated only with difficulty from the more distinctly biologic as- Thursday; Friday fair, light to mod pects of the talk about "race decay." The scientist, must take a position toward this question, and the physician in particular is often expected to contribute an illuminating opinion on such topics. Shall be champion the cause of those whose motto is "increase and multiply," or shall be pause to examine the ideals of the modern study of engenies which embraces those agencies by which the human race may be improved?

In the past the efforts to elevate mankind were largely fostered by various types of social reform which aimed to improve the conditions of life, to perfect our environment. The future calls for a program which will be directed toward the !! very sources of life. Our generation carries heavy and complicated social burdens which are inflicted on it in the form of an ! increasing dependent class typified in the feeble-minded. It is to be expected that this load can be raised by some movement to control life. This is work for the social hygiene of the future.

Political Judges Are the Cause For Public's Distrust of Courts

By HENRY M. FARLE, Lawyer, of New York

AYMENT OF POLITICAL DEBTS RENDERED TO POLITICAL BOSSES BY APPOINTMENT TO RICH RECEIVERSHIPS OF THE BOSSES' FRIENDS BY JUDGES WHO OWE THEIR PLACES ON THE BENCH TO THEIR POLITICAL MORE THAN THEIR JUDICIAL ATTAINMENTS IS A CUSTOM IN THIS

Outrageous violations of the rules of practice so that litigation is a battle of wits instead of law and one in which the judge is usually a mere umpire and not a real presiding indical other is what has caused the criticism of our courts in many cases.

Litigants hear lawvers expressing the hope that their cases will not be sent to certain judges because of alleged racial leanings, political animosities or athliations of the mage and opposing counsel or the flat statement that the judge is INCOMPETENT. Lawyers frequently agree to avoid a certain judge and withdraw motions and petitions to avoid political appointees, and maneuvering cases to or from judges for political reasons is treated as an important part of a lawyer's work.

Trials often are all HURRY, WRANGLING, IMPROPRIE-TIES, puerile arguments, sharp practice and ingenious efforts to get a reversible error into the record.

To the intelligent business man of today a trial is a contest of wit, cherp practice, bullying and chicanery before A POLITICAL OF-FICER CALLED A JUDGE. The lawyers usually misconduct themselves, pervert the facts and appeal to the prejudice of a jury that knows little if anything of its duties.

Poetry-Today

This book is all that's left me now; Tears will unbidden start; With faltering lips and throbbing

brow. I press it to my heart. For many generations past, Here is our family tree; My mother's hand this Bible clasped, She, dying, gave it to me,

Ah! well do I remember those, Those names these records bear-Who cound the hearth-stone used to

After the evening prayer; And speak of what those pages said Though they are with the

Here they are living still

My father read this hely Book To brothers, sisters dear

Who leaned God's word to hear! What thronging mem'ries come! Again that little group is met

Thou truest friend man ever knew

The mines of earth no treasures give That could this volume buy It taught me how to die.

SELLERS OF UNWHOLESOME FOOD

The Supreme court of Louisiana recently rendered a decision which is of interest to everyone who even occasionally dines in a public restaurant. The plaintiff claimed that he was poisoned from having eaten cakes and chocolate with whip ped cream at the defendant's confectionery where refrest ments were served to the public.

The court holds that a seller of food, such as chocolate and cakes sold at a public eating place, is presumed to know How ca any unwholesome condition of the food, and is liable for damages to a purchaser through being made ill on account of un- Her angel face wholesomeness. It is common knowledge, to which the keeper | What of a public eating place must be held, that food in which the within the halls of hom process of decomposition has begun is liable to make the person who eats it ill

The measure of damages sustained by a purchaser of food, where all wer who is made ill through its unwholesomeness, is not merely reimbursement of the price, but all damages that were foreseen or could have easily been foreseen as likely to have resulted.

The court thinks that \$100 was not an excessive award to a purchaser of food for illness resulting from ptomain poison- it taught me how to die ing caused by unwholesomeness of the food, where he suffered intense pain, believed for two hours that he was in danger of death and suffered an attack of jaundice in consequence.

RACE DECAY AND SOCIAL HYGIENE

The cry about "race suicide" which is so frequently heard, nowadays is taken by some to represent a serious sociologic problem demanding earnest consideration on the part of farseeing nations. There can be no doubt that a fall in the birthrate has been spreading in Europe for several decades; but the question arises whether the undeniable statistical facts justify the alarmist statements and protests which have gone forth from time to time. Are the nations involved and the world at large threatened with dire consequences from the failure of certain classes to replenish the earth with successors of their own kind?

Discussions of this sort are primarily of interest to the ally fair Thursday and Friday sociologist rather than to the physician. But they can be elimi- Illinois Fair, slightly nated only with difficulty from the more distinctly biologic as Thursday; Friday fair pects of the talk about "race decay a position toward this question, and the physician in particular is often expected to contribute an illuminating opinion on such topics. Shall be champion the cause of those whose motto is "increase and multiply," or shall be pause to examine the ideals of the modern study of engenies which embraces those agencies by which the human race may be improved?

In the past the efforts to elevate mankind were largely fostered by various types of social reform which aimed to improve the conditions of life, to perfect our environment. The future calls for a program which will be directed toward the very sources of life. Our generation carries heavy and complicated social burdens which are inflicted on it in the form of an !! increasing dependent class typified in the feeble-minded. It is to be expected that this load can be raised by some movement to control life. This is work for the social hygiene of the future.

Political Judges Are the Cause For Public's Distrust of Courts

By HENRY M. EARLE, Lawyer, of New York

AYMENT OF POLITICAL DEBTS RENDERED TO POLITICAL BOSSES BY APPOINTMENT TO RICH RECEIVERSHIPS OF THE BOSSES' FRIENDS BY JUDGES WHO OWE THEIR PLACES ON THE BENCH TO THEIR POLITICAL MORE THAN THEIR JUDICIAL ATTAINMENTS IS A CUSTOM IN THIS COUNTRY

Outrageous violations of the rules of practice so that litigation is of every kind that we go a battle of wits instead of law and one in which the judge is usually a give mere umpire and not a real presiding judicial officer is what has caused the criticism of our courts in many cases

Litigants hear lawyers expressing the hope that their cases will the first few days. not be sent to certain judges because of alleged racial leanings, political animosities or affiliations of the audge and opposing counsel or the flat statement that the judge is INCOMPRIENT. Lawvers fre- | sam quently agree to avoid a certain judge and withdraw motions and petitions to avoid political appointees, and maneuvering cases to or from judges for political reasons is treated as an important part of a lawyer's | pears, work.

Trials often are all HURRY, WRANGLING, IMPROPRIE-TIES, puerile arguments, sharp practice and ingenious efforts to get a reversible error into the record.

To the intelligent business man of today a trial is a contest of wit, sharp practice, bullying and chicanery before A POLITICAL OF-FICER CALLED A JUDGE. The lawyers usually misconduct themselves, pervert the facts and appeal to the prejudice of a jury that knows little if anything of its duties.

Copper Output

The United States Geological Survey has just issued an advance statement of the production of copper in pays to advertise. - Commercial 1911. This statement, prepared by Tribune. B. S. Butler, gives the final figures of production as made up from reports from all the reduction plants. the blue that's all blue. Ask your This summer in Berlin the most ex-The preliminary estimate of the smelter output of the country, issued by the Geological Survey January 2, 1912, differed from the final figures by but a fraction of I per

The total smelter production from ores mined in the United States was I am a candidate for County Au- 1,097.232,749 pounds. This is the with the output of 1,080,159,509 pounds for 1910.

> Arizona again leads the list of copper-producing states with a profuction of 303,202,532 pounds, the argest production ever made by the state. Montana is second, with 271 814,491 pounds; Michigan third, with 218,185,236 pounds; and Utah fourth, with 142,340,215 pounds.

The most notable gains were made by Alaska and Utah, the production of Alaska increasing from 4,311,-026 pounds in 1910 to 22,314,889 pounds in 1911, and that of Utah from 125,185,455 pounds in 1910 to 142,340,215 pounds in 1911.

The states showing the most marked falling off in output were California and Montana. The former decreased from 42,760,200 pounds in 1910 to 35,835,651 pounds in 1911, and the latter from 283,078,473 pounds in 1910 to 271,814,491 pounds in 1911 In California the decrease was due to difficulty in controlling smelter fumes; in Montana it was caused by voluntary curtailment due to the condition of the copper market. The total production of refined

copper from primary sources both domestic and foreign, was 1,433,-875,025 pounds in 1911, compared with 1,422,039,135 pounds in 1910. In addition to the copper producd from ore a total of 214,000,000 pounds was recovered by the treatment of old copper and brass, copper and brass scraps, filings, clippings,

The consumption of copper in the United States for 1911 was apparently somewhat smaller than in the previous year, but the amount exported was considerably greater, so that the stock of refined copper held in the United States were materially reduced.
